

深度學習理論與應用

(Deep Learning Theory and Applications)

Course number : MEME552

Time : 9:10-12:00 am, Tuesday

Location : 工 EN 4055-2

Wei-Chih Tseng (曾偉智)

E-mail: wctseng@mail.nsysu.edu.tw

Assignments Grading Criteria

■ Submission

- Create a Google Colab or Jupyter Notebook and name it as "Student ID_Assignment - Question Number". E.g. xxxxxx_1-1
- Upload the completed file to TronClass.
- The first assignment task must be completed and submitted within the class. Otherwise, will be recorded as an absence.
The TA will take screenshots after class as evidence.

■ Grading Criteria

- Plagiarism penalty (Both the provider and the copier [x-5.0]), Zero Tolerance!
- Variable naming (Do not use vague names like a, b, c, etc...)
- Code documentation (Add comments to explain your logic and steps)

HW9-1

Practice 1: Image processing on CIFAR-10 with skip connection

- Continue the HW8-1, upgrade the CNN with **skip connection** based on the flow diagram on the right.
- Create a **subclass of nn.Module** to define the network.
- Write a training loop and train the model for **100 epochs** using the **SGD optimizer** and **Cross Entropy Loss**.
- Print out the **accuracy of validation dataset**.
